

Canine Reproduction and Dog Breeding Form

Breed:

Age:

Sex:

Color:

Weight:

Diet:

Past breeding history:

1. Has your dog produced puppies in the past? If so, when, at what age, and how many pups were in the litter(s)?
2. Has your dog had any health conditions or problems with reproduction?
3. Has your dog had a fertility exam or check up recently?
4. If your dog has had recent lab work or medical records, please have results available if you wish to discuss them.
5. If you have progesterone or LH values on your female, please list the levels and dates. If your male has had a recent semen analysis, please provide results.

Please list the topics or concerns that you would like to discuss, in order of priority:
